## Important Information Regarding Notarization of Signatures

To ensure that your declaration is not rejected for notarization errors, we offer the following guidelines:

- 1) Make sure the names of both partners and the address(es) are legible in Section 1.
- 2) The partner name, i.e document signer, NOT the notary name is printed by the Notary, in the “by” line in Section 4.
- 3) Remind the notary that each signature needs a separate notary stamp.
- 4) Ask the notary to make sure the stamp has enough ink, does not smear, that the whole stamp is clear and that the complete notary signature is legible.
- 5) A document may be notarized by a notary in another state. If signing the document in another state, the notary may cross out “Nevada” and handwrite in the state in which the notary is notarizing the signatures.
- 6) Below is how a document should be properly notarized.
